

A3  
14. (Amended) A dry erase board comprising:  
a transparent semi-rigid body having an integrally formed dry-erasable surface ,  
the body further having a pocket for receiving a sheet and a sheet having indicia printed on the  
sheet.

---

17. (Amended) The dry erase board of Claim 14, wherein the body is capable of  
receiving indicia in correlation to indicia printed on the sheet.

18. (Amended) The dry erase board of Claim 15, wherein the pocket has an  
integrally formed dry erasable surface.

A4  
19. (Amended) A method of using a dry erase board comprising the steps of:  
providing a transparent semi-rigid dry erase board including a front face having  
an integrally formed dry erasable surface and an open back surface for removably receiving a  
sheet of material; and  
removably securing the sheet of material to the dry erase board.
